IEEE JEA Workshop 2017
September 12-13, 2017

Track Name: Digital Transformation-Big Data Analytics, and Cloud Computing

Session Number	2
Title	Data Science…The First Steps
Abstract	Data Science and analytics are transforming the world as we know it, Data Science is a key to solve problems in any area of life. In this session, we will discuss what is Data Science, what are the skills required to be a Data Scientist, introduction to one of the Data Science tools (R Language), and other general Data Science concepts.
Special Requirement	Projector, Flip chart board, Internet connection
Speaker Name	Eng. Al-Mutaz Bellah Ahmad Ghanem
Affiliation	Data Science Engineer – INTRASOFT Middle East
Photo	
Bio	Al-Mutaz Bellah is a data science engineer at INTRASOFT Middle East, a leading IT Solutions provider and systems integrator. He studied Computer Engineering at the University of Jordan, he started his career with Realsoft Advanced Applications as Business Intelligence Developer/Architect, then he joined INTRASOFT Big Data team which is the first Big Data team across Jordan. Al-Mutaz Bellah is Passionate about areas related to Data Science, Big Data and Analytics, and how using analytics is changing every business. Al-Mutaz Bellah's skill bag contains Data Science, R Language, Big Data, Business Intelligence, Data Integration and ETL, and Databases.
